Nutrition and anatomy & Physiology they should give extra focus on it.

Anatomy & physiology quiet difficult for me to understand. An also the biochemistry take extra importance

Anatomy & physiology quiet difficult for me. you can take extra classes for microbiology because it's important for nursing profession

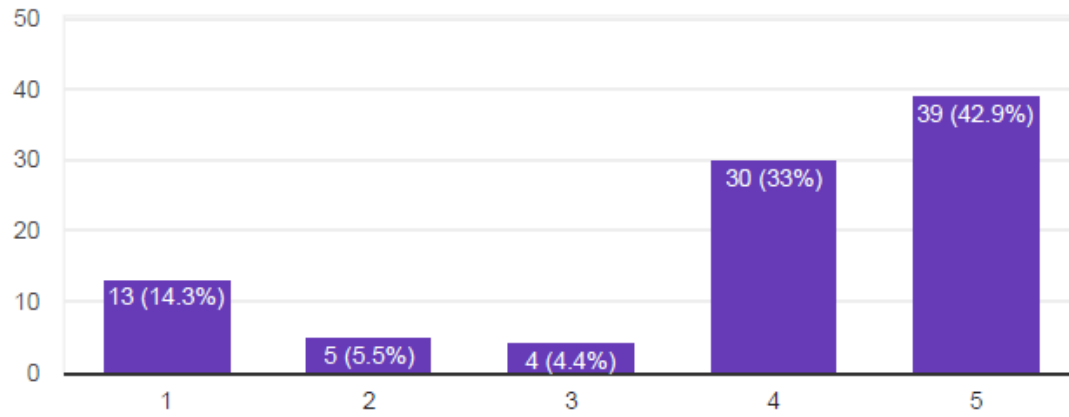

Community posting place should be change each year.... If each year not than at least for every 2years... Because people are not opening the door.. .they are irritated with us.... We need clinical attendance for at least 95% because we are also the human beings... Any time any thing happen with us also so at least we need 90to95% in clinical....

Firstly, community postings places for 2nd year have to be changed because we face alot of problem looking for our clients.also, we don't get enough time for lunch during our STNM postings because bus reaches late there and by the time we reach college,it's already 1:35 most of the time. We,the students, would be very much grateful if the college would look into this matter and find a solution to these problems faced by us....thank you so much.

Medical Surgical Nursing –I

Find pharmacology and genetics little bit complicated and difficult

Unable to understand pharmacology

Amazing exposure to clinical area with finest of faculty members.

In medical surgical nursing we should have a anatomical practical classes (especially in surgery)that we can related the disease condition better

This institution is awesome and nice. Here theory and practical goes hand in hand. You get to learn lots of new things and you are free to explore to various field with good guidance in your path
